Technology can be a powerful learning tool when used with specific learning goals in mind. It can help create a more engaging and authentic learning environment. As each course and instructor can have different learning goals and technological needs, the Teaching with Technology Summer Camp will provide instructors a choice between two themes: Technology-Enhanced Learning & Assessment and Designing Media-Rich Course Assignments. During this five day event, participants will engage in hands-on workshops, training sessions, and pedagogical discussions.

…Join us at Summer Camp!

- Do you want to use technology to enhance student engagement with course material, but you’re not sure how?
- Do you want to design engaging digital media projects for students but aren’t sure where to begin?
- Do you struggle with creating a UVaCollab course-site that reflects your pedagogy and streamlines your teaching?

Date: June 22-26, 2015
Location: Robertson Media Center, (3rd Floor, Clemons Library)
